[Don't Fire The Man Who Outsourced His Job. Promote Him!](#)

Hey Michael,

I ended up on your site after reading one of your comment on [growandconver.com](#).

Your post with the **BFF Commenter** technique is **EXCELLENT!** In fact, I'm going to put it in practice today.

It's so relevant to me because I just launched my website/blog as well :)

(I want to help entrepreneurs build stunning websites with all the features to grow their businesses.)

I just published my [first article](#) on how to speed up your WordPress site in less than 1 hour...

... In the process of writing this article, I checked how optimized were several blogs I follow.

I noticed that your website doesn't have Expires Headers and doesn't use a CDN.

You probably know this as you've created many websites before. I thought I would let you know in case it escaped your attention :)

For expires headers I use **WP Performance Score Booster & CloudFlare** as my CDN. Both tools are easy to configure and very efficient. Do you usually use other services?

Have a good one!

Pierre

P.S: I just subscribed to your list, looking forward to your next post!

[Don't Fire The Man Who Outsourced His Job. Promote Him!](#)
